| • React.js | • Next.js | • Git/Github |
| • Zustand | • Zod | • Tanstack Query |
| • i18next | | |

PROJECTS

OraLink (Graduation Project) 
• Built a role-based dental clinic management platform supporting five distinct roles — Admin, Student, Supervisor, Doctor, and Head of Department — each with tailored permissions and workflows.
• Developed clinical tools including periodontal chart components and patient file management, along with treatment procedure approval workflows between students and supervisors.

- Implemented image upload/delete diffing for patient records, notification systems, and submission management across roles.
- Built decision support system (DSS) report views and admin dashboards to support clinical and academic oversight.

Cima Zone

- Built a movie discovery platform using the TMDB API, featuring genre browsing, search, and detailed person/actor pages.
- Implemented favorites and watch-later functionality with Zustand for persistent client-side state management.
- Designed engaging UI elements including carousels and skeleton loaders for smooth, polished loading states.
- Built consistent, accessible interface components using shadcn/ui throughout the app.

Rinic (Freelance)

- Built an e-commerce platform for selling portraits and frames using Next.js, with a separate React-based admin panel for product and order management.
- Implemented client-side state management with Zustand and data-fetching/caching with TanStack Query for a responsive shopping experience.
- Designed consistent, accessible UI across both storefront and admin panel using shadcn/ui components.
- Built core commerce flows including product catalog, cart, checkout, and order management.

Stance Festival (Freelance)

Landing page for stance festival event for cars. Sponsored by El Seba3y, Ashraf and Ministry of youth and sports
